					<p>This bridge project includes the demolition and removal of timber piers, wingwalls, partial removal of abutments, and removal of the timber superstructure. The work consists of the construction of a five span concrete bridge, two concrete abutments, four wingwalls, four concrete filled steel pipe piers, and the reconstruction of approximately 400 feet of the Bayberry Road/Julian Street bridge approaches. The bridge will be closed to vehicular traffic during construction and traffic will be diverted away from the site through a detour route. Also, the proposed Captain Stanley Bridge will replace the existing wooden bridge with an eight span pre-cast concrete bridge. Sidewalks and lighting will also be added. The adjacent intersections will also be made handicap accessible. Passage below the bridge by boat traffic will be enhanced with a wider channel and greater vertical clearance than the existing bridge.</p>
